ACTION Plan - PRIORITIZED list if 57 treatment areas – Rancho Del Sol is # 2 on the list !

Table 8-1 Action Plan

#	Action/Description	Lead Agency	Partners	Cost Estimate	Funding Sources	Timeframe	Priority	Plan Integration
Landscape Treatment								
1	Camp Nauvoo–Newtown (1) Fuels Reduction Project. Treatment involves vegetation and brush management and was selected because it ties into other treatment projects, addresses wildfire risk in a one-way in/out neighborhood in the WUI and the periphery treatment zone, and helps protect a critical facility - the Placerville Municipal Airport. This treatment would establish a fuel break for Motor City and address evacuation concerns in the Bucks Bar wildfire scenario assessed in the EDC MJHMP and Wildfire Evacuation Study. The project would complement several other existing and ongoing treatments: Texas Hill Fuel Load Reduction Project, Texas Hill Weber South, and the Fire Adapted 50 Project; thereby enhancing connectivity and fuel treatment effectiveness.	EDC RCD	EDC OWPR	Very High	CAL FIRE Wildfire Prevention Grant, SNC WIP Grants	Short-Term	High	CWPP
2	Rancho del Sol (2) Fuels Reduction Project. Rancho del Sol is predominantly rural residential and designated Firewise one-way in/out gated community situated between North Fork Weber Creek and South Fork Weber Creek with moderate to steep slopes along the canyons and ridge lines. It was also evaluated as part of the El Dorado County MJHMP Wildfire Evacuation Plan. This project would complement completed and planned sections of the Fire Adapted 50 Phase III and the Highway 50 Forest Health Improvement projects. This project will reduce fire risk in a neighborhood primarily built before the new construction standards and complement the transportation-focused recommendations and considerations in the Wildfire Evacuation Plan. It will also create continuity and connectivity across existing efforts with a focus on critical ingress/egress concerns that could occur associated with the Bucks Bar wildfire scenario. New ADA compliant website requirement

State and local governments must make sure that their web content and mobile apps meet WCAG 2.1, Level AA within two or three years of when the rule was published on April 24, 2024, depending on their population.

You can find more information about why the Department is requiring compliance with this timeline in the [rule](#) in the section of the appendix called “Requirements by Entity Size.”

This table shows how much time a state or local government has to comply with this rule.

State and local government size	Compliance date
0 to 49,999 persons	April 26, 2027
Special district governments	April 26, 2027
50,000 or more persons	April 24, 2026

Remember: On April 24, 2024, a change to Title II, ruled that web content provided by State and Local governments, (EDCFSC and AFSCs as non-profit organizations fall into this category) need to be ADA compliant. For more information regarding ADA compliance go to:

<https://www.ada.gov/resources/2024-03-08-web-rule/>
